Section 1 Identification

Product Code and Name: 425 Speed

Company Name and Address: 3D INTERNATIONAL 20724 Centre Pointe Parkway, Santa Clarita CA 91350

Business Phone: 888-999-7627

Emergency Telephone Number: CHEMTREC 1-800-424-9300 (US) All other locations 01-661-250-2020

Section 2 Hazards Identification

Classification of the Substance or Mixture: 1) ACUTE TOXICITY: ORAL Category 4. 2) SKIN CORROSION/IRRITATION Category 2. 3) EYE DAMAGE/IRRITATION Category 2A

GHS label elements:

Signal Word: Warning

Hazard Statement: 1) H302 Harmful if swallowed. 2) H315 Causes skin irritation. 3) H319 Causes serious eye irritation

Precautionary Statements:

Prevention: P264 Wash hands thoroughly after handling. P270 Do not eat, drink or smoke when using this product. P280 Wear protective gloves and eye protection

Response: P301 + P312 IF SWALLOWED: Call a POISON CENTER or a doctor/physician if you feel unwell. P330 Rinse mouth. P302+P352 IF ON SKIN: Wash with plenty of soap and water. P321 Use Moisturizing cream.

P332 + P313 If skin irritation occurs: Get medical attention. P362 Take off contaminated clothing and wash before reuse.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337+P313 If eye irritation persists: Get medical attention.

Storage: Keep closed and away from children. Keep away from heat or flame

Section 3 Composition/Information on ingredients:

Substance/Mixture: Mixture

Product Description: Correcting Polish

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8
Section 5 Fire Fighting Measures

**Extinguishing Media**

**Suitable extinguishing media**

Regular Foam, Waterfog, Carbon Dioxide, or Dry Chemicals

**Unsuitable extinguishing media**

None known

**Specific hazards arising from the chemical**

In a fire or if heated, a pressure increase will occur and the container may burst.

**Hazardous thermal decomposition products**

**Special protective actions for fire-fighters**

If there is a fire, Promptly isolate the scene by removing all persons from the vicinity of the incident.

**Special protective equipment for fire-fighters**

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Hazardous Decomposition:**

Oxides of carbon or traces of hydrocarbons may be formed in small amounts.

**Special Fire Fighting Procedures:**

Clear fire area of personnel. Do not enter confined fire area without full bunker gear and positive pressure breathing apparatus.

**Unusual Fire / Explosion Hazards:**

Not Listed
Section 6 Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flares in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in for "For non-emergency personnel".

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air)

Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Use spark-proof tools and explosion-proof equipment. Dispose via a licensed waste contractor. Contaminated absorbent material may pose the same hazard.

Use Gloves, Goggles, Boots and Breathing Mask. Small amounts do not need special measures. Clean up with water. For large spills remove all sources of ignition. Ventilate area. Absorb with an inert absorbent material. Avoid runoff into drains and sewers. All used and unused product should be disposed of in conformance with local, state, and federal regulations.

Section 7 Handling and Storage

Precautions for safe handling: Put on appropriate protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved alternate made from a compatible material, keep tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Do not reuse container. Wash thoroughly after use.

Conditions for safe storage: Store in original container protected from direct sunlight in a dry, cool and wellventilated area, away from incompatible materials (see Section 10) and food and drink. Do not store in unlabeled containers either empty or full. Secure all chemicals out of the reach of children.

Appropriate engineering controls: No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Individual protection measures

Hygiene Measures: Wash hands forearms and face thoroughly after handling chemical products.

Eye/face protection: Wear chemical safety goggles.

Skin protection: Avoid skin contact. Wear chemical resistant impermeable gloves.

Respiratory protection: None.

Volatile Organic Compound (VOC) content for Consumer Products Applications Percent by weight: 0%

## Section 10. Stability and reactivity

Reactivity: No specific test data related to reactivity available for this product or its ingredients
Chemical stability: The product is stable
Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reactions will not occur
Conditions of instability: When exposed to high temperatures or sun rays colors may fade and bottles may pan
Conditions to avoid: Keep closed
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

Sensitization | There is no data available
Mutagenicity | There is no data available
Carcinogenicity | There is no data available
Reproductive toxicity | There is no data available
Teratogenicity | There is no data available
Specific target organ toxicity (single exposure) | There is no data available
Specific target organ toxicity (repeated exposure) | There is no data available
Aspiration hazard | There is no data available

### Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure
- Potential immediate effects: Not available
- Potential delayed effects: Not available

#### Long term exposure
- Potential immediate effects: Not available
- Potential delayed effects: Not available

#### Potential Chronic health effects
- General: Not known significant effects or critical hazards
- Carcinogenicity: Not known significant effects or critical hazards
- Mutagenicity: Not known significant effects or critical hazards
- Teragenicity: Not known significant effects or critical hazards
- Developmental effects: Not known significant effects or critical hazards
- Fertility effects: Not known significant effects or critical hazards
Section 12. Ecological information

Toxicity: Not available
Persistance and degradability: Not available
Bioaccumulative potential: Not available
Mobility in soil: soil/water partition coefficient (Koc): Not available
Other adverse effects: No known significant effects or critical hazards

Section 13. Disposal considerations

The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the sewer but processes in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
